WHERE CYCLISTS GET HURT

5,157 cyclists killed or seriously injured on London's roads, 2021–2025.

The worst patches are in central and inner London, where the most people ride.

READING THE MAP

Each hexagon is 400 m across. Its colour shows how many cyclists were killed or seriously injured inside it in five years.

more than 20 m from any cycle lane or track

BY YEAR

THE FIVE WORST SPOTS

1. **Blackfriars**
   New Bridge Street
2. **Tooting**
   Upper Tooting Road
3. **Tottenham**
   High Road
4. **Clapham**
   Clapham High Street
5. **London Bridge**
   south end of the bridge

Most cyclists killed or seriously injured within about 90 m.

HOW THIS WAS MADE

Police-reported collisions (STATS19) where a cyclist was killed or seriously injured, in the Metropolitan and City of London police areas. Many injuries are never reported to the police. The map shows where crashes happen, not how risky each road is: busy routes see more crashes partly because more people ride them.
