LONDON, CONNECTED?

1,458 km of cycle tracks, in 3,964 separate pieces.

The longest joined-up stretches are on the edges of London. In the centre, the longest is just 22 km.

READING THE MAP

The six biggest joined-up networks of cycle track:

Great West Road, Hounslow	90 km
Royal Docks	59 km
Lea Valley, Stratford	57 km
Lea Valley, Walthamstow	43 km
Thamesmead	42 km
Central London	22 km
Every other piece of cycle track	

6%
of all cycle track is in the biggest joined-up network

3,712
pieces of track are less than 1 km long

HOW THIS WAS MADE

Cycle tracks are OpenStreetMap ways tagged as cycle tracks or cycleways, as mapped on 5 November 2026. Two pieces count as joined if they meet or come within 20 m, a short hop across a junction. Painted lanes and bus lanes aren't counted as track. OpenStreetMap is mapped by volunteers, so a crossing that isn't mapped can split a route that is joined on the ground.
