# Spot the deer!

**683 real deer sightings in Richmond Park and Bushy Park. The glowing patches show where people see deer most.**
Can you find the 10 deer hiding on the map? Then tick off the landmarks you've visited!

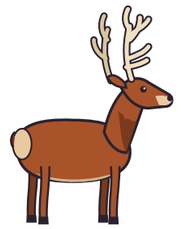

**Hidden deer: 10**
Some are red deer and some are fallow deer. Each one is hiding where lots of real deer have been spotted.

## Landmarks to tick off:

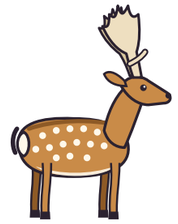

- ☐ Pen Ponds
- ☐ Isabella Plantation
- ☐ Pembroke Lodge
- ☐ King Henry VIII's Mound
- ☐ Diana Fountain
- ☐ Heron Pond
- ☐ Woodland Gardens

## Red deer

- The biggest wild animal in Britain.
- In autumn the stags **roar** to show off.
- Their antlers fall off every spring and grow back bigger.

## Fallow deer

- Smaller, often with white spots.
- The bucks have flat antlers, like a hand.
- Their coats come in colours from white to almost black.

## Baby season

- Baby deer are born from May to July.
- Mums hide them in the tall bracken.
- If you find one, leave it alone: mum is nearby.

## Deer parks

**Richmond Park**: about 600 deer, here since King Charles I made it a hunting park almost 400 years ago.
**Bushy Park**: over 320 deer. King Henry VIII hunted here!

## Best months to spot deer

Sightings peak in late summer and autumn, when the stags get ready for the rut.

## Deer spotter's promise

I stay **at least 50 metres away** (about four buses long), I never feed the deer, and I keep my dog on a lead.
